

City Terrace

Technical Specifications

Seating and Capacity

The City Terrace of The Long Center is a multi-configurable “event space”. Wheelchair and handicap access is available in all configurations. There is elevator access via the Rollins Lobby and pedestrian access from street level via a sidewalk.

Maximum Space Capacity is dependent on layout configuration. In general, “standing room only” capacity is 2,000. Capacity with tables and chairs is dependent on amount of furniture used. Capacity numbers must include all people working a given event. Please consult with Event Manager.

Room Dimensions (see drawing below):

Floor Plan Dimensions: 278’ x 125’ – a “half circle

Floor to Ceiling Height: 30’ tall at Ring Beam, 18’ under west balcony

Audio Equipment – There is no permanent staging, lighting, or audio equipment on The City Terrace. Depending on availability, some equipment is available for rent. Please contact event supervisor for details.

Loading Access

Vehicle access is up the circular sidewalk on the north side, adjacent to Riverside Drive. Heavy vehicles must stop at the edge of City Terrace for unloading. Elevator access is available from box office/Rollins Lobby.

Electrical Power Circuits

The City Terrace does not have a permanent theatrical lighting system. There is recessed lighting for up lighting the Ring Beam and LED lights inset on the Compression Ring element set into the lawn. Control of these zones is generally through photometric cells, however they can be disabled by Building Operations staff with prior notice.

There are various 20A circuits, with Edison plugs around the Terrace. There are additional 30 amp “bar plugs” that can be configured for an additional 3x 20 amp circuits per “bar plug”. Under the Terrace there are four (4) “company switches”. Two (2) at 200 amps, Two (2) at 400 amps. Use of the company switches requires additional feeder cable. Cable and labor are the responsibility of renters/vendors.

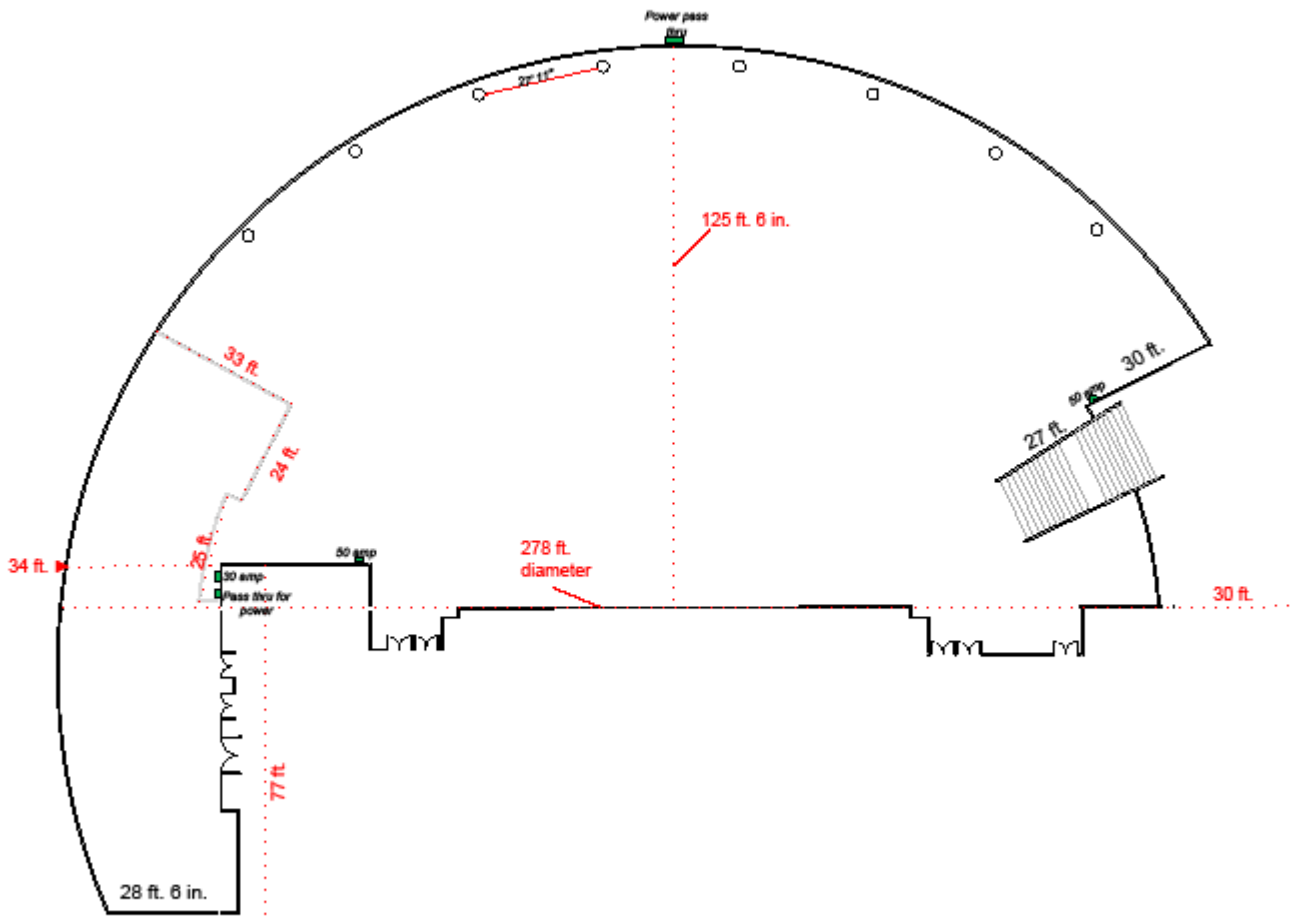

Sound System

Depending on availability, there are sound systems available. There is a charge for these systems. Consult with Sterling Events on charges. The available sound system packages are designed around crowd numbers and size of system required.
